SUMMARY

I am a DevOps Engineering Manager with 9 years of direct professional experience in product design and development, with innovative thinking capacity and a simplified approach to organization. I started developing with GoLang, which trained me with solid knowledge in data structure and data flows. In the last year I worked for Kueski, a Mexican fintech with a high-growth BNPL product. In this job I led a scalability team with my team. We implemented Kubernetes (EKS) from scratch, enabling the company to scale from 50rps to 350rps in a few months

WORK EXPERIENCE

- 2024 **DevOps Engineering Manager (currently)**
Kueski - [kueski.com](#)
- 2021 **DevOps TechLead**
Kueski - [kueski.com](#)
